Attached file name	SWP490_FA26SE036_R2_Registration.pdf

After this point the project scope does not change.

3. Mandatory Features

ID	Feature	Actor	Acceptance criteria	Workflow	Owner
F-01	Authentication and role-based access	Staff (5 roles)	5 failed logins lock the account for 15 min; a role cannot open screens or APIs outside its permissions (403)	WF-01 (used by every workflow)	Thuận
F-02	Marketplace connection and order sync	Admin, System Scheduler	A new Lazada order appears within the shop sync interval + 1 min (default ≤ 6 min); a duplicate event creates no second order	WF-01	Thuận
F-03	Order consolidation and groups	Store Owner, Shipping Coordinator	Orders with the same recipient key join one open group; a merge after a scan is rejected	WF-01	Thuận
F-04	Stock reservation and FIFO lots	Warehouse Staff	Picking consumes the oldest lot first; bin stock never becomes negative	WF-02, WF-06	Thi
F-05	Picking with missing-item handling	Warehouse Staff, Packaging Staff	A scan over the ordered quantity is rejected; a reported missing item stops the group until a decision	WF-02	Phượng
F-06	3D packing plan, approval and packing	Packaging Staff	Every item is placed or the plan cannot be approved; a parcel outside weight tolerance is held for review by another person	WF-03	Việt

ID	Feature	Actor	Acceptance criteria	Workflow	Owner
F-07	Shipping with GHN	Shipping Coordinator	One GHN order per parcel; a GHN return (or, without carrier API, a second failed attempt) moves the shipment back to the warehouse	WF-04	Thuận
F-08	Returns and exchanges	Customer, Store Owner, Warehouse Staff	A request after 15 days is refused; the creator of a ticket cannot approve it; an exchange creates a replacement order	WF-05	Thi
F-09	AURELLE web store and order tracking	Customer	A placed order shows a 7-step progress bar that follows warehouse and carrier events within 1 minute	WF-05	Thi
F-10	Documents and labels	Warehouse, Packaging Staff, Shipping Coordinator	Packing slip, shipping label, picking list, manifest and bin labels download as PDF	WF-03, WF-04	Việt

4. Non-Functional Requirements

ID	Quality attribute	Metric	Threshold	Measurement method	Owner
NFR-1	Performance	Time from Lazada order creation to appearing in OptiPack	≤ sync interval + 1 min (default ≤ 6 min)	Create a test order and compare with the sync job log (TC-NFR1, manual)	Thuận
NFR-2	Performance	Packing plan computation time per order	BRKGA p95 ≤ 1 s; CP-SAT proof ≤ 6 s	be/scripts/solver-benchmark.ts and cpsat-benchmark.ts on 300 orders (TC-NFR2)	Thi
NFR-3	Security	Failed logins before lockout; role checks	Lock after 5 failures for 15 min; 100% of staff endpoints return 403 to an unauthorized role	Automated auth / role-guard tests (TC-NFR3, TC-F01-02, TC-F01-03)	Thuận
NFR-4	Reliability	Status write-back success	Up to 8 retries with back-off; 0 lost changes	Outbox test: AURELLE returns errors, job retries until the limit (TC-NFR4)	Thuận
NFR-5	Data integrity	Stock correctness under repeated / concurrent scans	0 negative bin stock; a repeated scan with the same client event id is not counted twice	Send the same pick scan twice with the same client_event_id (TC-NFR5)	Phượng
NFR-6	Availability	Packing without the optimization service	Plan still produced when the CP-SAT service is down (label heuristic)	Stop the packer service and compute a plan (TC-NFR6)	Thi

5. Out of Scope

Item	Reason
Order sync for Tiki, TikTok Shop, Shopee,	Partner API access constraints (BM03 #1). Tiki: the team is registering a

Item	Reason
Facebook Marketplace	tax code for a Tiki seller account (stated at Review 2); the Tiki adapter added on 31/10/2026 is outside the Review 2 demo
Write-back of order status to Lazada	Lazada is read-only by design; only AURELLE receives status and stock write-back
Live carriers other than GHN	GHN (staging) is the only carrier with a live API; others use sample rate tables
Excel / PDF analytical report export	Only CSV export of the action history (BM03 #2)
Mobile app (Flutter)	Planned for Iteration 3 (Design Brief G1); scanning is done on the web portal
